### **DETAILED ACTION**

In view of the appeal brief filed on 3/3/06, PROSECUTION IS HEREBY REOPENED.

A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

#### ***Claim Objections***

1. Claims 18 and 19 are objected to because of the following informalities: Claims 18 and 19 each depend from claim 5, which has been cancelled. It is believed that claims 18 and 19 should each depend from claim 17. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1772

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Flesher (US 5,158,324).

Regarding claims 1, 3, 11 and 12, Flesher discloses a decorative cover comprising a flexible, magnetic sheet (Fig. 3, #104, also see col. 4, lines 43-49) and a decorative layer (Fig. 3, #102; also see col. 4, lines 58-64) laminated to the magnetic sheet to form a lamination dimensioned to cover the component substantially completely (see col. 1, lines 55-68), the decorative layer is vinyl (see col. 4, lines 54-55), the lamination defining an aperture positioned to be aligned with the physical feature when the lamination is mounted on the component (see col. 2, lines 6-10).

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 17-19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-10 of copending Application No. 09/999,400. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims and the specification of copending Application No. 09/999,400 are broad enough to encompass or include that which is recited in the present patent application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
